

Grant Writing 101

An Online Presentation

September, 2017

Agenda

- Grant writing basics
- Komen's Grants eManagement System (GeMS)
- Komen's grant application components
- Grant writing resources

Learning Objectives

By the end of this presentation, you should be able to:

- Utilize planning and writing techniques to make any grant application stronger
- Understand basic functions of GeMS
- Incorporate writing techniques into the appropriate sections of Komen NEO's grant application

Acknowledgement

Komen Northeast Ohio would like to acknowledge

Dr. Rachel Pohle-Krauza, PhD, RD/LD,

Associate Professor of Nutrition, Youngstown State
University

Scientific Staff, Summa Health System

Faculty, Consortium of Eastern Ohio MPH Program
(CEOMPH).

Grant Writing Basics

What is Grant Writing?

- A process
- Requires skills, persistence, and practice
- Begins with a well-planned project idea
- Articulates the project idea through effective writing
- Depends upon a good fit between applicant organization and mission of the funder

Planning the Proposal

- Read everything!
- Consider the funding priorities and Guiding Principles in Grant Making carefully
- Discuss ideas with decision-makers in your organization
- Explore opportunities for collaboration
- Prepare proposal together

Things to Keep in Mind

During proposal development:

- Good organization is critical
- ALWAYS follow the funding agency's guidelines
- Be brief, neat, and clean
- Be positive
- Seek good proof readers
- Collaborate with others
- Be persistent

Planning, Writing, and Submitting the Proposal

The Grant Seeking Process

Essential Planning Steps

- Identify your topic
- Assess the capabilities of your organization and complete IRB process (if applicable)
- Refine the project idea and gather data to support it
- Identify collaborative partners
- Develop a logic model
- Identify funding source(s) and gather submission requirements

Writing and Submitting the Proposal

- Build a problem statement based on what you learned in the planning phases
- Gather and compose elements of the proposal
- Conduct a final review
- Review, submission, and notification

The flowchart above suggests one way to organize the grant writing process.

Essential Planning Steps

Step 1: Identify your topic

- Breast health and/or breast cancer
- What point on the continuum of care will be your program's focus?

Step 2: Assess organizational capacity

- Do we have necessary expertise on staff?
- Does the staff have adequate time and resources available to implement the project?
- Is the project in line with the organization's mission?

Essential Planning Steps

Step 3: Refine project idea and collect data to support it

- Komen NEO Community Profile
- Abstracts of funded programs
- Perform a literature review
 - Isolate your topic
 - Define your scope
 - Keywords
 - Consider informational needs
 - Locate information
 - Read, absorb, integrate

Essential Planning Steps

Step 4: Identify collaborative partners

- Collaborate at all levels
- Maximize strengths, experience, skills, and knowledge
- Should take a holistic approach
- Eliminate duplication

Essential Planning Steps

Step 5: Develop a logic model

- Present a picture of how your initiative is supposed to work
- Convey underlying set of assumptions as to why the program will work
- Show relationship between inputs, processes, and outcomes

A Bit More About Logic Models

Why use logic models in grant writing?

- Identify resources [inputs] needed
- Lay out the short- and long-term impact of program [outcomes]
- List program activities [interventions]
- Link program elements to their expected outcomes
- Can assist in identifying areas of possible collaboration

A Bit More About Logic Models

What are the benefits of a logic model?

- Integrate planning, implementation, and evaluation
- Prevent mismatches between activities and effects
- Leverage partnerships
- Enhance accountability
- Set priorities for allocating resources
- Reveal data needs
- Define a shared language and shared vision for community change

Essential Planning Steps

Step 6: Gather submission requirements

- Everything you need is in the RFA!
- Refer to the Internal Compliance Checklist prior to submission

Writing and Submitting the Proposal

Step 1: Build a problem statement

- Lay out the issue, needs, or problem your program will address
- The planning process should have answered the question “**What** is the problem?”
- The problem statement will answer the question “**Why** should we do something about the problem?”

Developing a Statement of Need

1. Select national objective related to target health problem
2. Identify the health problem in global terms, and support your statements with national and state data
3. Show that the health problem affects your target population and support this assertion with data
4. State your solution BRIEFLY (name and goal of program)
5. State what can be gained in terms of value(s) and benefit(s) to the decision-maker
6. State why you think you'll be successful
7. Provide references to support your claims

Evaluating a Statement of Need

How do you know when you've written enough about the problem?

- Did you use recent research?
- Did you include statistical indicators?
- Did you give the reader enough information to understand the problem?
- Did you present recent findings of your own?
- Did you use words that will create compassion?
- Did you stay focused on the NEED?

Writing and Submitting the Proposal

Step 2: Gather and compose elements of the proposal

Step 3: Conduct a final review

Step 4: Submit application for review

Komen's Grant eManagement System (GeMS)

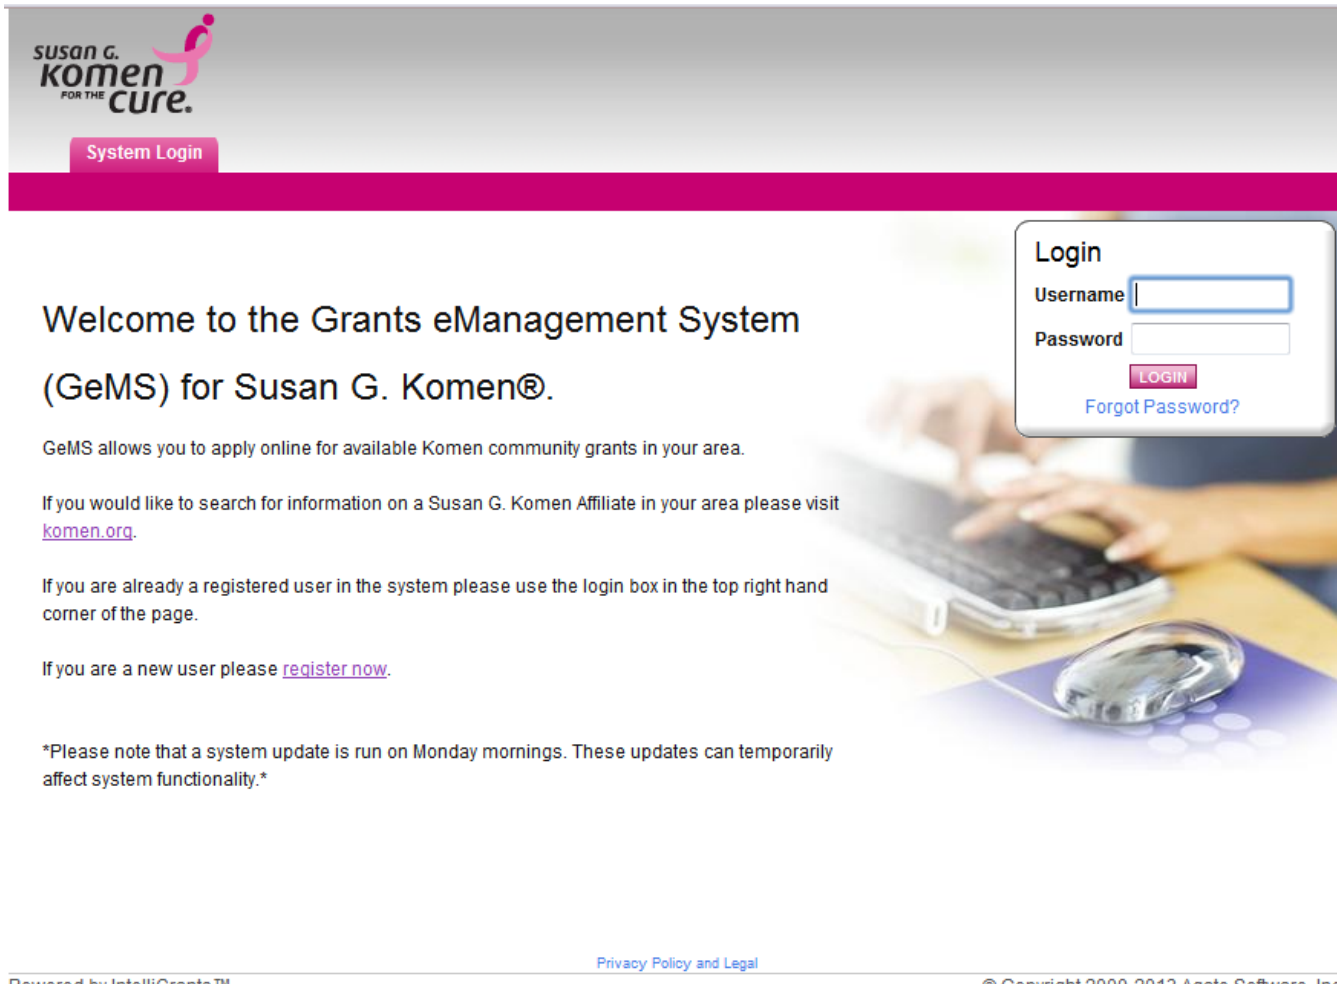

GeMS

The central location for all Komen applicants and grantees to complete all tasks associated with the Komen grant process.

GeMS – Web Link

GeMS Support Tools

Individuals who have never used GeMS before are strongly encouraged to review the available GeMS applicant user manual on Komen NEO's website.

If you ever run into an issue with GeMS, please contact the Affiliate directly for assistance.

Please allow 5-7 business days for a response to your GeMS inquiry.

Komen's Grant Application Components

The Grant Application

- Project profile
- Organization summary
- Project priorities & abstract
- Project narrative
- Project target demographics
- Project work plan
- Project work plan summary
- Salaries & key personnel
- Consultants
- Supplies
- Travel
- Patient Care
- Sub-Contracts
- Other
- Indirect
- Project budget summary

I. Project Profile

Contains basic organization and project information.

- Contact information and the distinction between various titles/roles
- Title of program should not include the words “Komen,” “for the cure,” or “find the cure”
- Letters of support should be obtained from every partner who will contribute to the completion of the program

II. Organization Summary

Collects information related to the applicant's organization.

- Organizational history
- Organizational structure
- Diversity and inclusion statement
- Important to note that the information should be provided for the organization as a whole, not just one particular department or unit

III. Project Priorities and Abstract

The CP funding priority you select should be in direct alignment with the primary project category.

CP Funding Priority	Project Category
Screening Navigation	Community Health Worker education, screening mammograms, CBE
Continuum of Care Navigation	Diagnostics, treatment, treatment support, patient navigation, systems change

III. Project Priorities and Abstract

Contains the main focus of the proposed project.

Components of abstracts:

- Subject – What is the project about?
- Purpose – Why is the project being done? What is the problem or need being addressed?
- Activities – What will be done? What methods will be used?
- Target population – What special group is being studied or served? How many do you plan to serve?
- Location – Where is the work being performed?
- Outcomes – What types of findings will result? To whom will these be useful?

IV. Project Narrative

The *Project Narrative* is the core piece of the application. Detailed information is required in this section.

After reading the Project Narrative an individual should fully understand the components of your program and what the program intends to complete

IV. Project Narrative

The Project Narrative consists of the following five sections:

- Statement of Need
- Project Design
- Organizational Capacity
- Monitoring and Evaluation
- Social Determinants of Health

V. Project Target Demographics

Collects information regarding the various demographic groups the project intends to target.

- Target populations listed are not necessarily the target populations of the Affiliate

VI. Project Work Plan

Includes the main goal, objectives, and activities for the entire project.

- Project goal – one overarching goal for entire project
- Project objectives
 - Timeline
 - Responsible personnel
 - Anticipated number of individuals served
 - Evaluation tools and forms

More information on developing goals, objectives, and an evaluation plan are included in the Monitoring & Evaluation 101 presentation on [Komen NEO's website](#).

VII. Project Budget

The *Project Budget* includes all the financial information related to the requested funding. It is broken into eight sections:

- Salaries and key personnel (required)
- Consultants
- Supplies
- Travel
- Patient care costs
- Sub-contracts
- Other
- Indirect
- Project budget summary
